Senior Full Stack Developer

Description
Join VentureDev to build and scale reliable backend services and modern web applications.

[illegible]
• Backend: Node.js and/or Python
• Frontend: React and TypeScript; Next.js is a plus
• Databases: PostgreSQL or MySQL
• Caching & processing: Redis and background jobs
• Integrations: Third-party APIs and webhooks
• Infrastructure: AWS or GCP, Docker, and CI/CD
• Quality: Automated testing and production monitoring

[illegible]
• Develop backend APIs and responsive frontend features
• Optimize application and database performance
• Own features from technical design through deployment
• Collaborate with product and engineering teams
