Description

We are looking for an experienced .NET Fullstack Developer with strong Angular expertise to design, develop, and maintain scalable enterprise web applications. The ideal candidate should have hands-on experience across backend development, frontend engineering, API integration, database management, and application security.

KEY SKILLS

- C# | .NET | ASP.NET Core
- Angular | TypeScript | JavaScript
- .NET Web API | RESTful APIs
- Entity Framework | Entity Framework Core
- SQL Server | Database Optimization
- HTML | CSS | Responsive UI Development
- Authentication & Authorization
- Unit Testing | Integration Testing
- Git | Agile Methodologies

PREFERRED SKILLS

- Microsoft Azure Services
- Azure DevOps | GitHub Actions | Jenkins
- Docker | Containerization
- Angular State Management
- CI/CD Pipelines
- Application Performance Optimization

RESPONSIBILITIES

- Develop end-to-end web applications using .NET and Angular.
- Build scalable REST APIs and backend services using ASP.NET Core.
- Develop reusable Angular components and responsive user interfaces.
- Implement database integrations and optimize SQL queries.
- Apply secure coding, authentication, and authorization practices.
- Perform unit testing, debugging, and production troubleshooting.
- Collaborate with architects, QA teams, and cross-functional stakeholders.
- Participate in code reviews and Agile development practices.
